

Strivio

Strivio-PM: User Guide

Getting Started & Everyday Tasks

Aktham Almomani

Landing Page

- Go to <https://strivio-pm.streamlit.app>
- Enter **your email**. If any projects are linked to that email, they'll appear automatically.
- Optionally, enter **your name** to display it in the app.
- Click **sign in/Continue**

Notes

- New here? You'll be prompted to create a project if none exist for your email.
- Private projects may ask for a PIN after sign-in.

Your email

you@example.com

Your name (optional)

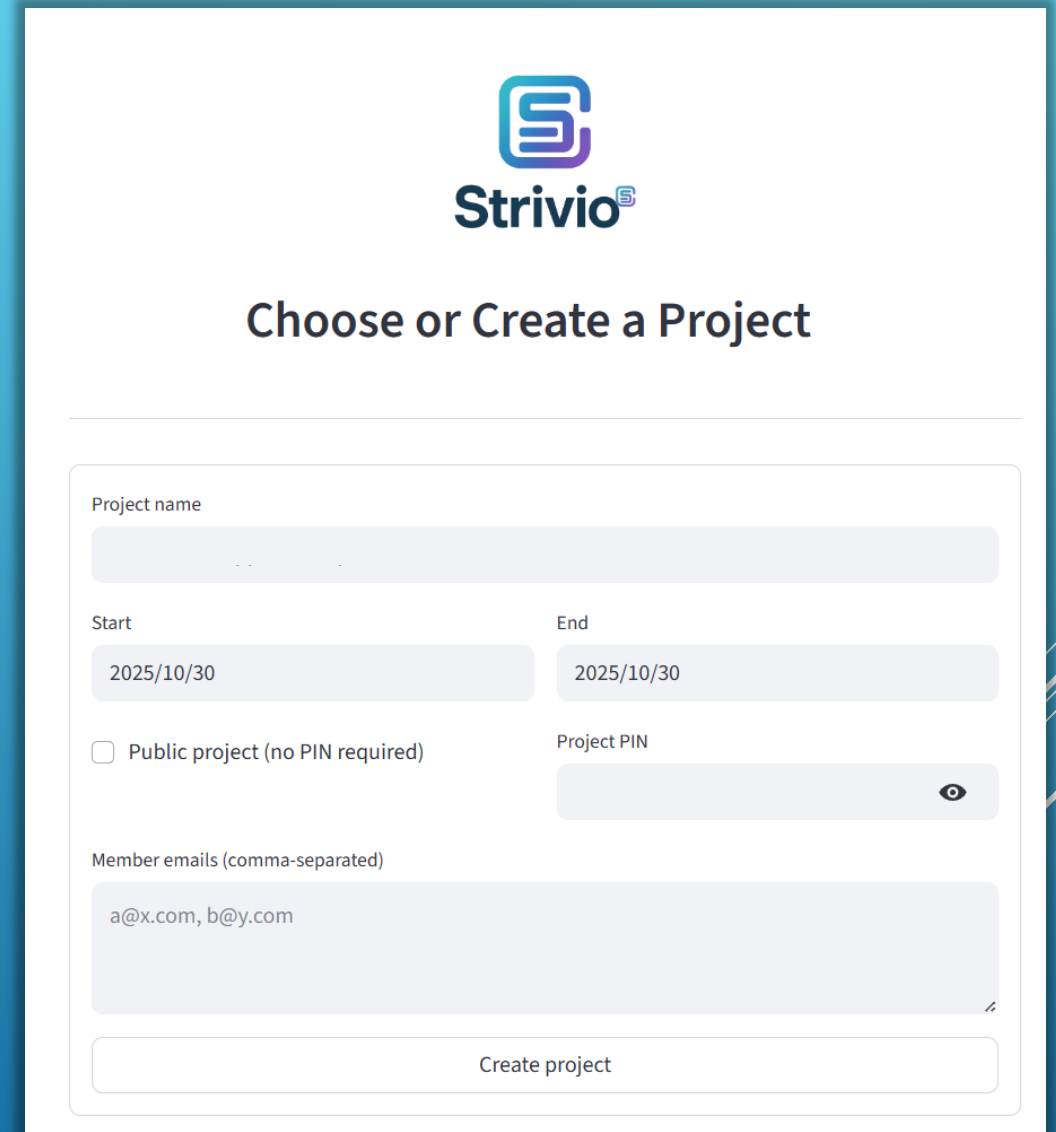

Sign in / Continue

Choose or Create a project

- If projects already exist for your email, select one from **Open existing project**.
- To create a new project, fill out:
 - Project name
 - **Start** and **End** dates
 - Access
 - **Public**: no PIN required
 - **Private**: set a **Project PIN** (members will need it)
 - **Members (optional)**: add emails, comma-separated
- Click **Create project**.

Notes

- You become the **owner** of projects you create.
- Dates must be valid (end date can't be before start date).
- You can add/remove members and edit details later from the sidebar.

The screenshot shows the Strivio web interface for creating a project. At the top is the Strivio logo, which consists of a stylized 'S' icon and the word 'Strivio'. Below the logo is the heading 'Choose or Create a Project'. The form is divided into several sections: 1. 'Project name' with a text input field. 2. 'Start' and 'End' date fields, both showing '2025/10/30'. 3. A checkbox labeled 'Public project (no PIN required)'. 4. A 'Project PIN' field with a toggle icon (an eye) to the right. 5. A 'Member emails (comma-separated)' field containing the text 'a@x.com, b@y.com'. 6. A 'Create project' button at the bottom right.

Create project

Project Access

Open an existing project:

- From **Open project**, choose the project name.
- If the project is **private**, enter the **Project PIN**.
- Click **Unlock** to open the workspace.

Create another project

- Expand **New project** to start a fresh one (name, dates, access, members).

Tips

- You'll see only projects shared with your email.
- Forgot the PIN? Ask the project owner to reset it or switch the project to public.

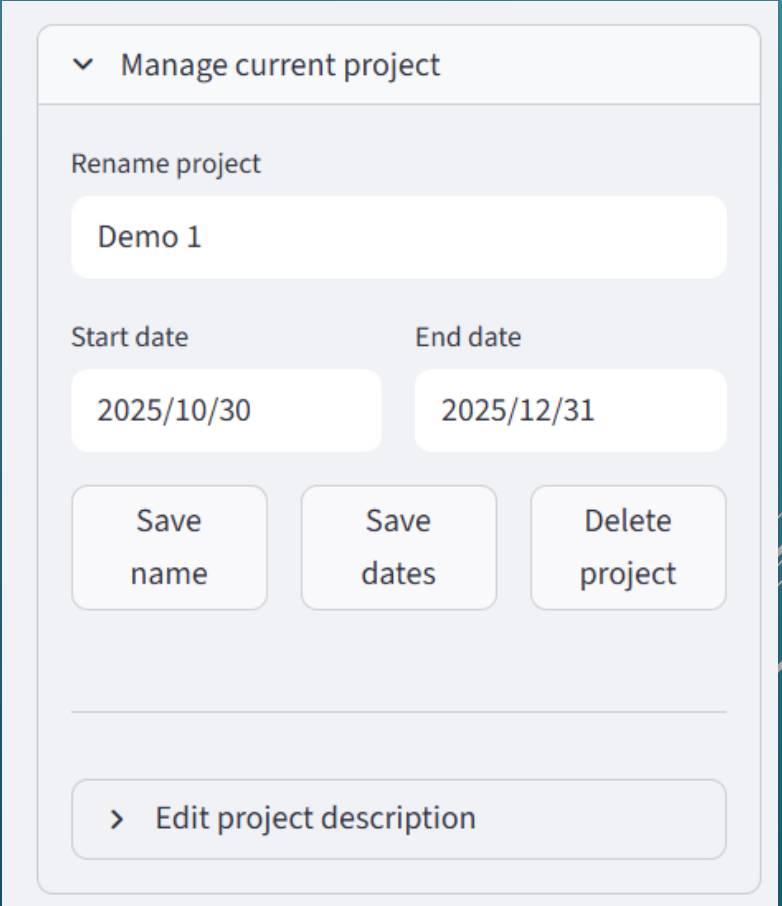

Project Modification

After you unlock a private project with the correct PIN, the **Manage current project** panel appears in the sidebar. From here you can:

- **Rename** the project: enter a new name and click **Save name**.
- **Change dates**: update **Start date** and **End date**, then **Save dates**.
- **Edit description**: open **Edit project description**, update the text, and **Save**.
- **Delete project**: permanently removes the project and its tasks. *(Owner only; this action cannot be undone.)*

Permissions: Owners can do all actions. Editors can update the description and tasks; viewers are read-only.

The image shows a sidebar panel titled "Manage current project" with a dropdown arrow. It contains the following elements:

- Rename project**: A text input field containing "Demo 1".
- Start date**: A date input field containing "2025/10/30".
- End date**: A date input field containing "2025/12/31".
- Action buttons**: Three buttons labeled "Save name", "Save dates", and "Delete project".
- Edit project description**: A button with a right-pointing chevron and the text "Edit project description".

Tab 1: Task

After you unlock the project with its **PIN**, you land on the project home. It has three tabs: **Tasks**, **Project Analytics**, and **Members**.

Tasks tab

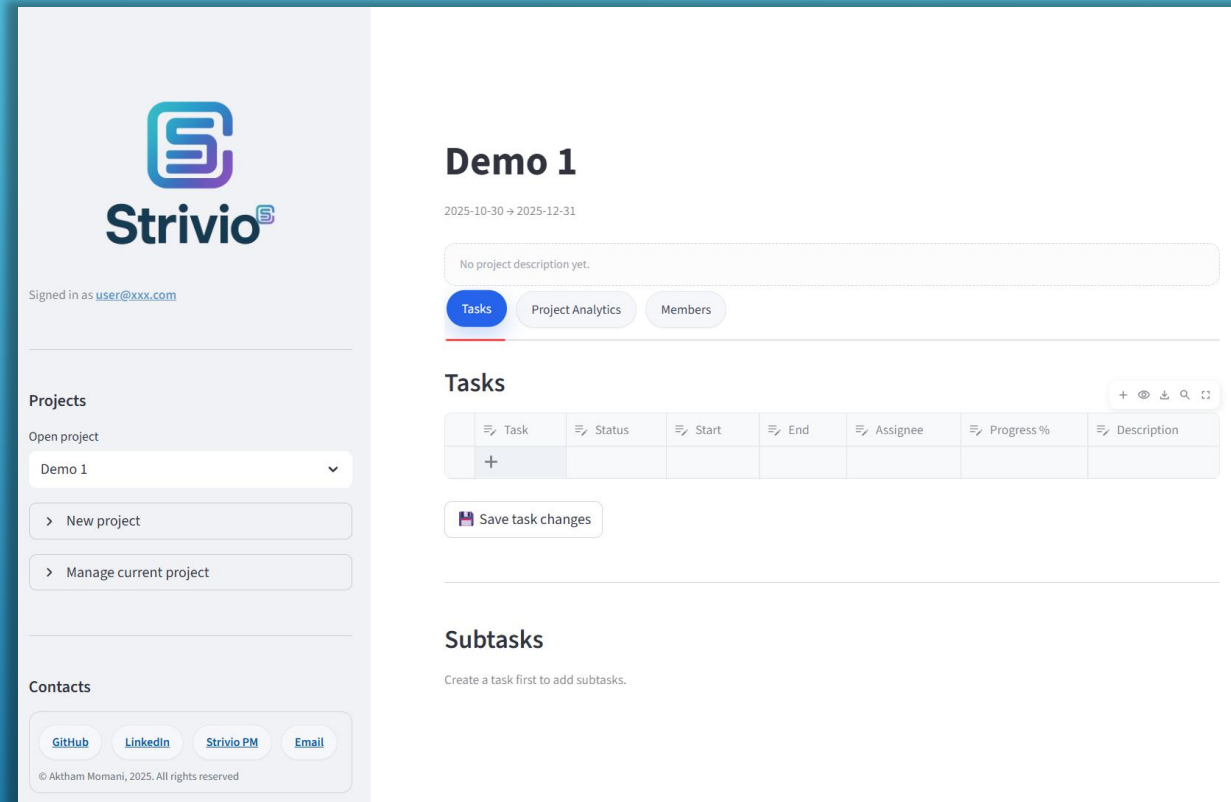

Create and manage your work items inline:

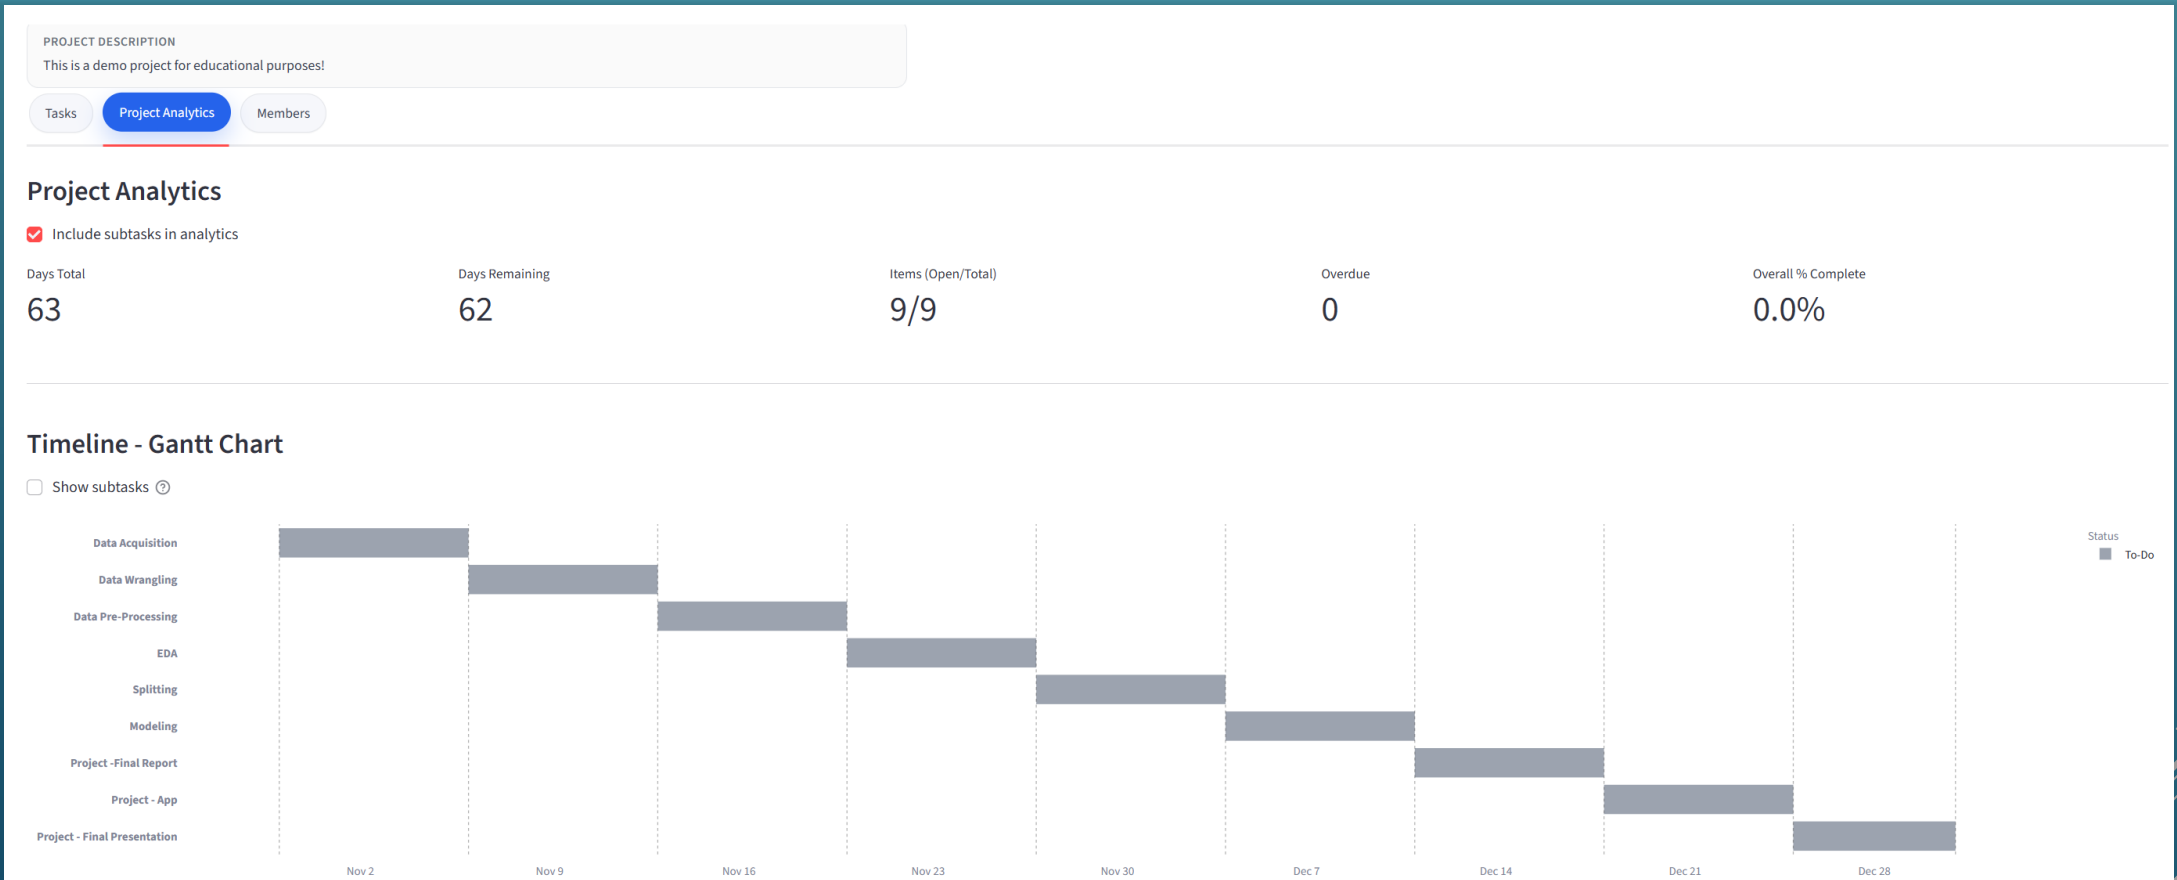

- **Task:** name of the task.
- **Status:** To-Do, In Progress, or Done.
- **Start / End:** dates (required for the Gantt).
- **Assignee:** email of the owner
- **Progress %:** 0–100.
- **Description:** brief notes.

Use **Save task changes** to commit edits.

Subtasks

Pick a task, then add its subtasks with the same fields (status, dates, assignee, progress).

Tab 2: Project Analytics

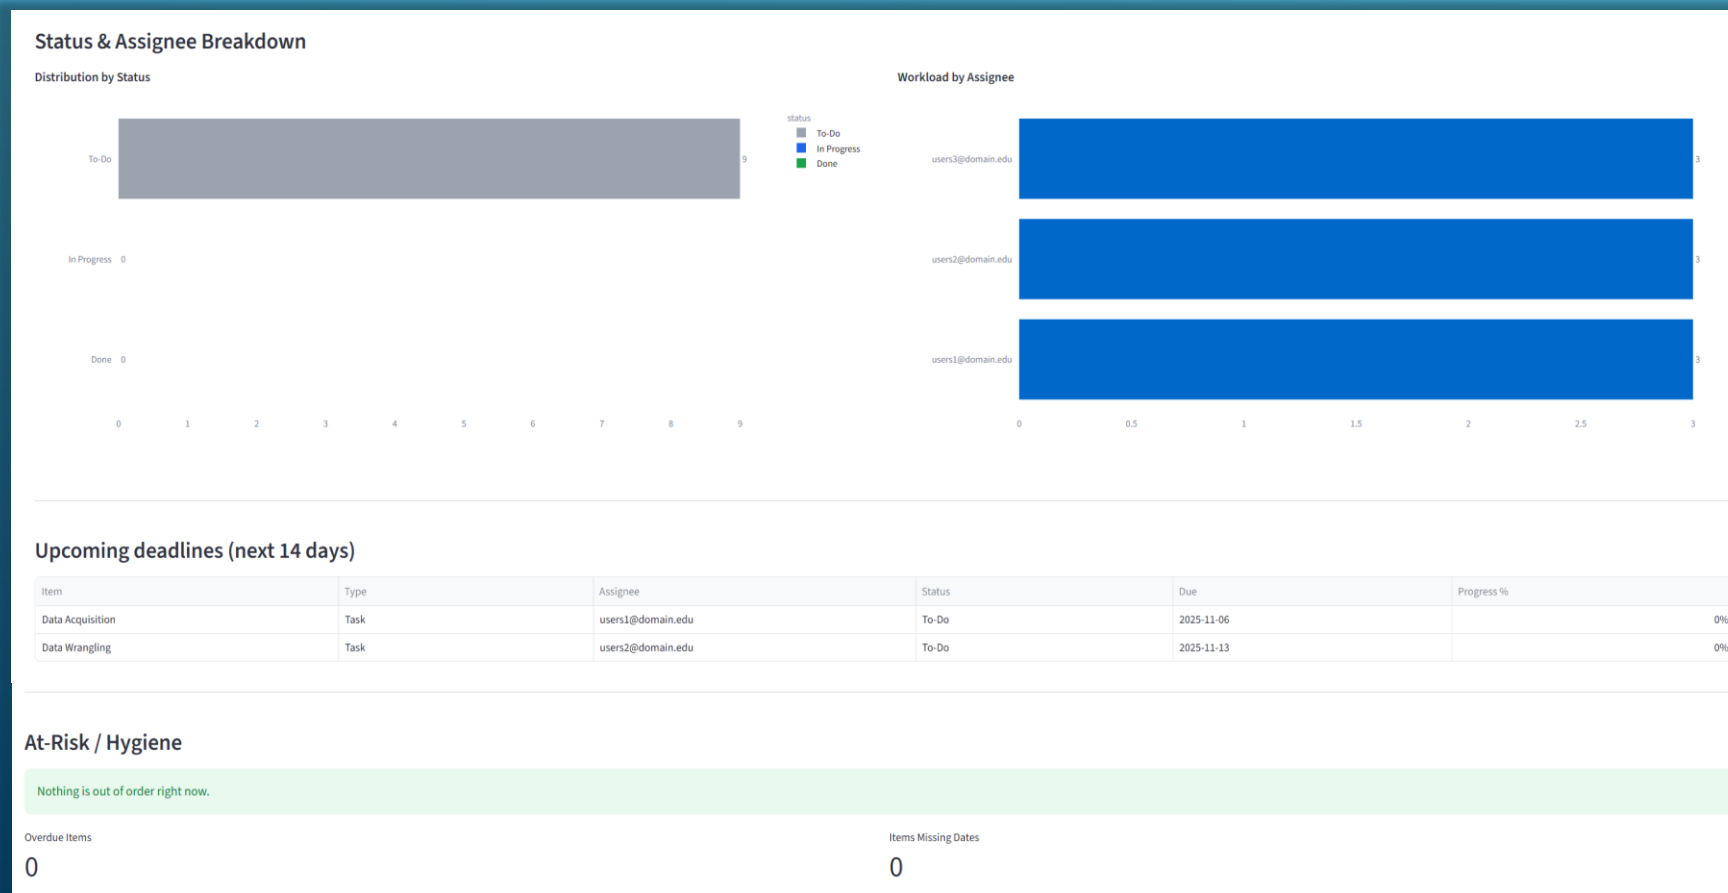

See the big picture for your project at a glance:

- **KPIs header:** total days, days remaining, open/total items, overdue count, and overall % complete.
- **Timeline (Gantt):** schedule of tasks (and, optionally, subtasks). Use **Show subtasks**

Tab 2: Project Analytics

- **Distribution by Status** (To-Do, In Progress, Done)
- **Workload by Assignee** (who owns how much work)
- **Upcoming deadlines (next 14 days)**: what's due soon, sorted by date.
- **At-Risk & Hygiene**: items that are overdue or missing start/end dates.

Tip: keep dates current on tasks/subtasks so KPIs, Gantt, and alerts stay accurate.

Demo 1

2025-10-30 → 2025-12-31

PROJECT DESCRIPTION

This is a demo project for educational purposes!

Role for new members

viewer

Add Members

Tab 3: Members

Add the people you'll work with and set what they can do:

- **Invite teammates:** paste emails (comma-separated).
- Choose a role:
 - **Viewer:** can see projects, tasks, analytics.
 - **Editor:** can add/edit tasks, subtasks, and descriptions.
- Click **Add Members** to grant access.

Tip: keep sensitive projects private with a PIN; only share with the teammates you trust.
